

Hong Kong, January 29th 2019

GFG Style announces Kangaroo, the new concept car that will be unveiled at the upcoming 2019 Geneva Motor Show.

It's called Kangaroo, an Electric Hyper-Suv: 2 seats, 4-wheel drive and 4-wheel steering, 0-100 Km/h in 3.5 seconds and a top speed of over 250 Km/h. On any terrain!

The electric platform has been developed in collaboration with CH Auto and presents a carbon fiber body covering an advanced aluminium space frame. "Currently - says Fabrizio Giugiaro, who has taken care of the styling with Giorgetto Giugiaro - we are only revealing the "eyes" of this extraordinary concept that, as in our tradition, will be completely unveiled in Geneva and drivable after the show on any terrain".
